

CSD 122 Web Project Phase 1

Bernice Carbaugh 2/4/2020

General Layout

Initially, I'm not going to have a lot of material so I'm going to keep it simple and short like this web site. The website title will be my name, followed by a top navigation menu.

<http://www.callieschweitzer.com/>

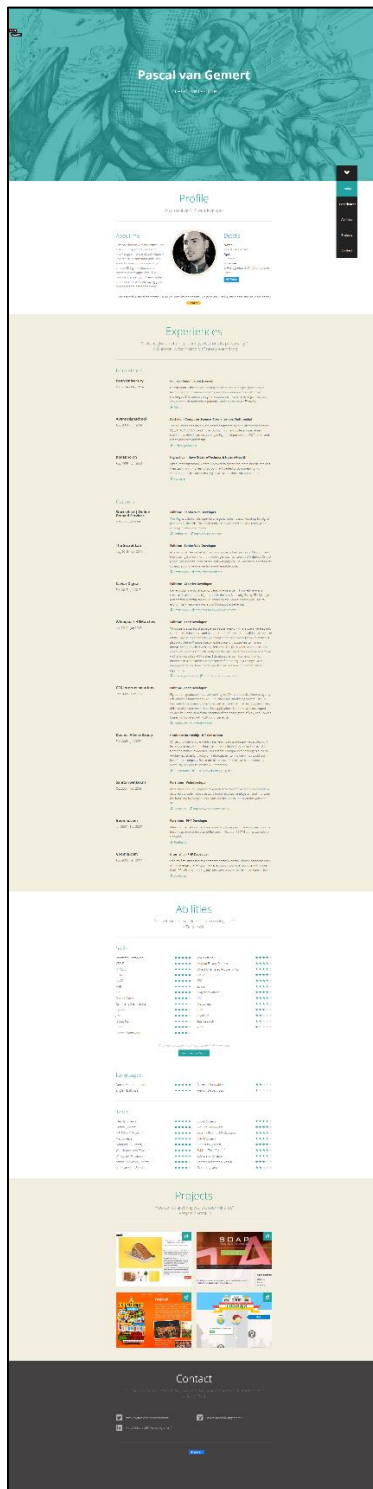

<http://www.pascalvangemert.nl/>

I also like this simple one-page interactive resume website. Initially, the navigation menu on the right is anchored to the top landing section on basically just one long page.

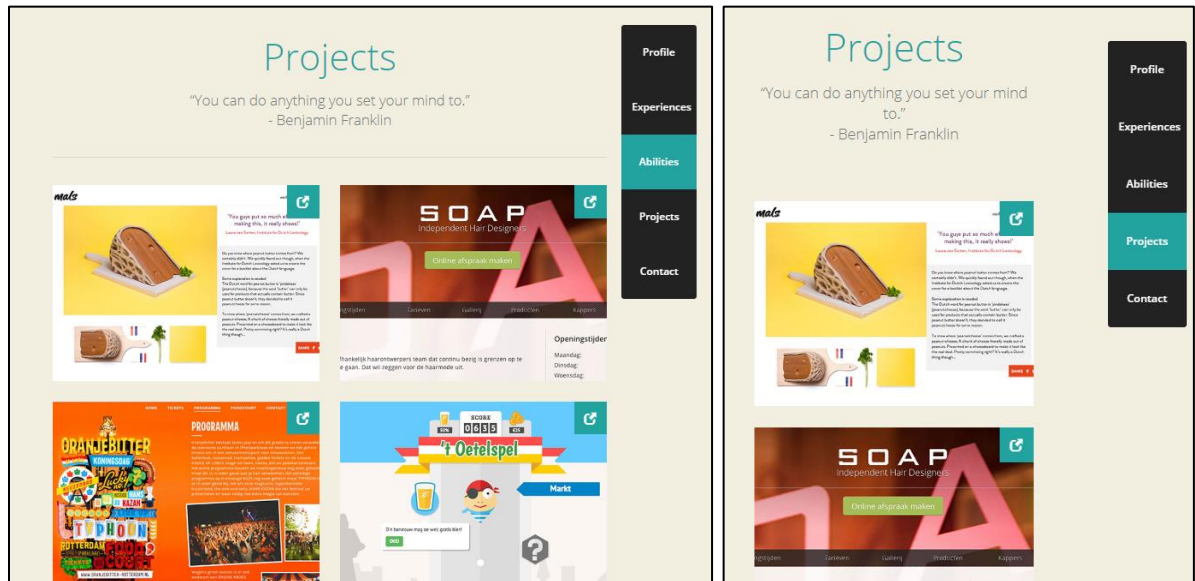

As you navigate to the different sections, that menu turns into a clever, floating element highlighting which section you're on. I like the bold colors of this website, and the use of background colors

Sections

- Home – image and paragraph about me and the website.
- Projects – page that will showcase some projects from this class and maybe other work outside this class. I plan to use cards for each project, and the layout should be responsive, maybe displaying 2-3 cards horizontally for larger screens and 1 card per row for smaller screens.

- Resume – online version of my resume with links as appropriate.
- Real Estate – I am a real estate investor on the side and may use this personal web site to showcase my real estate work. Not sure yet.
- About – more details about me, my work, and outside interests.
- Contact – form that lets people contact me.

Color scheme and font family

I had a lot of fun looking over different color schemes and haven't decided. I'm collecting color themes here to decide later. It will be pretty subdued and monochromatic.

29. My 360 mirror

To achieve a clean elegant look accompanied by a sense of luxury, the designers of this website used a dark grey color scheme jazzed up with mysterious turquoise nuances. The website color palette includes:

- ONYX
- TAUPE GRAY
- WHITE SMOKE
- QUEEN BLUE
- MEDIUM TURQUOISE

1. Beauregard

A website that focuses on the art and beauty of watch designs. The website offers an intuitive experience and was made with a beautiful color scheme conveying purity and comfort. The hex codes correspond to the following colors:

- ISABELLINE
- QUICK SILVER
- AUROMETALSAURUS
- LIGHT GRAY
- BLACK OLIVE

Teal #4aa8b3

10. Lobster

The pink-blue combo is among the most preferred color mixes that please the eye. For this website design, the designer has chosen several nuances of pastel blue jazzed up with energizing pink.

- GLITTER
- POWDER BLUE
- GREEN-BLUE
- WHITE
- FANDANGO PINK
